

Money Puzzle Tour for Korea

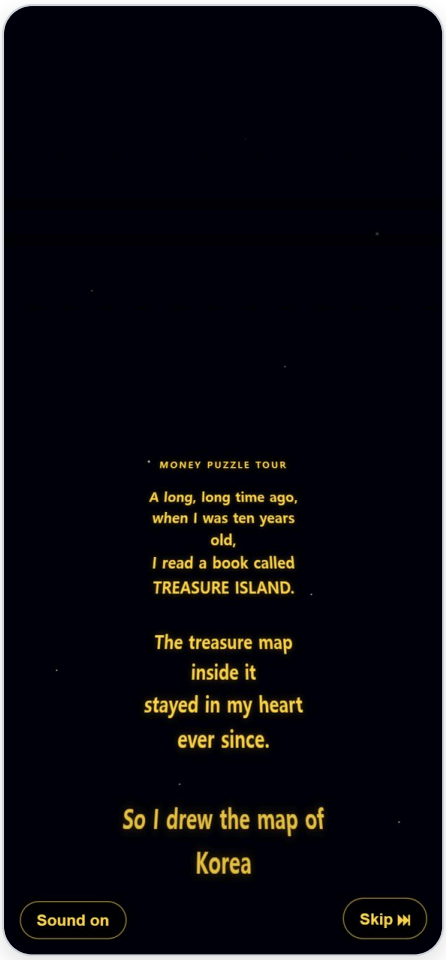

User Manual

Just scroll up and down like a webtoon — plan your whole trip on one screen.

You can open this manual any time from the Library on the app map (near Gwanghwamun). Screens as of October 2026; the app may look slightly different. Map pictures show approximate locations — check the exact spot on the detailed map.

Contents

1

Opening story

When you first open the app, the “Treasure Island” story scrolls by. Tap “Skip” (bottom right) to go straight to the map, or “Sound on” for music. Tap the treasure island on the map to watch it again.

2

The home screen

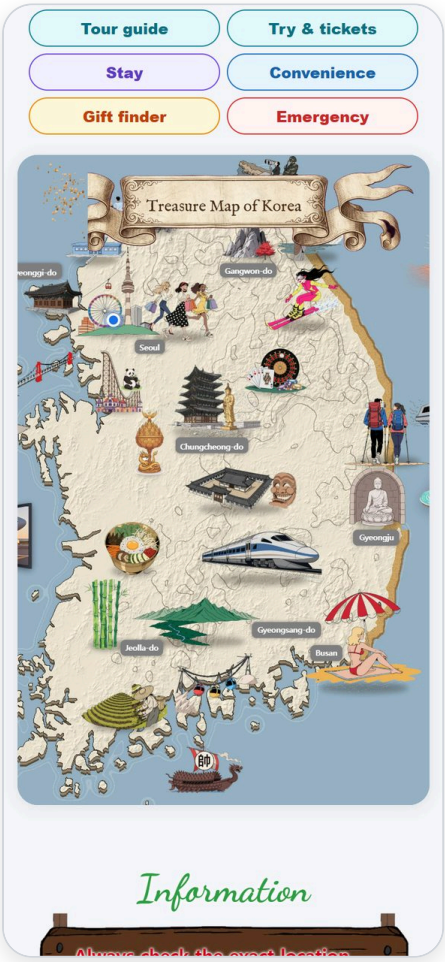

The top bar has My trip (cart), Reset, the globe (language), the speech bubbles (interpreter), night mode and the ⋮ menu. Below are the search box, the “Search” and “Get ideas” buttons, six menu buttons and the treasure map. Just scroll up and down.

3

Change the language

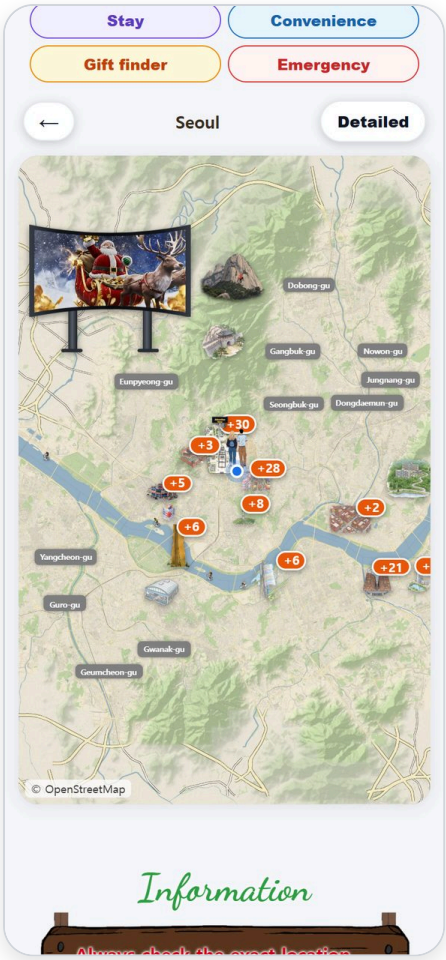

Tap the globe in the top bar to choose 한국어, English, Español, 日本語, 简体中文 or 繁體中文. The screen you are on switches to that language right where you are.

4

The treasure map of Korea

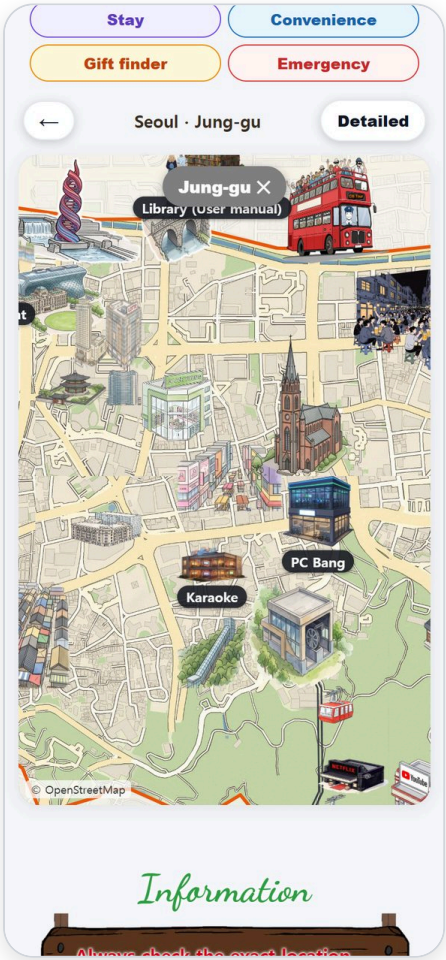

All of Korea appears as an illustrated map. Pinch to zoom; tap a picture to open that sight's card. Tap a region name (Seoul, Gangwon-do…) to enter that region's map.

5

Region maps (e.g. Seoul)

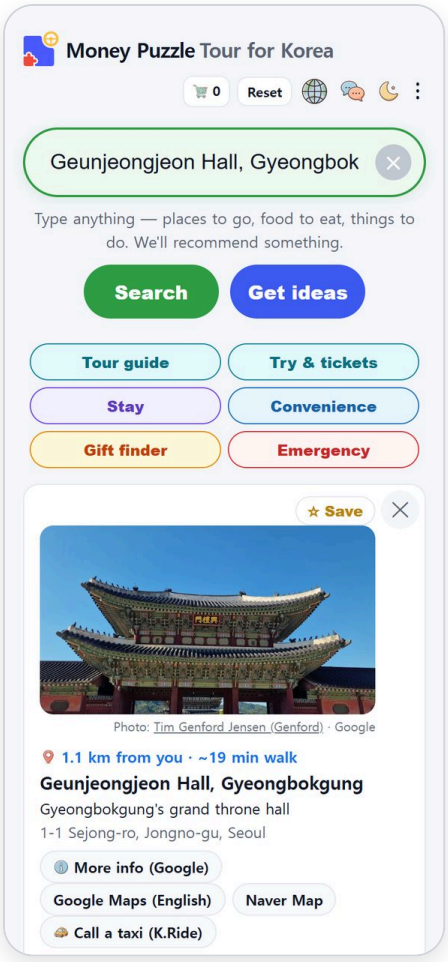

Each district shows a main picture and "+number" (how many sights it has). Tap a district picture or name to enter its map. Use ← (top left) to go back; "Detailed" opens the real street map.

6

District maps

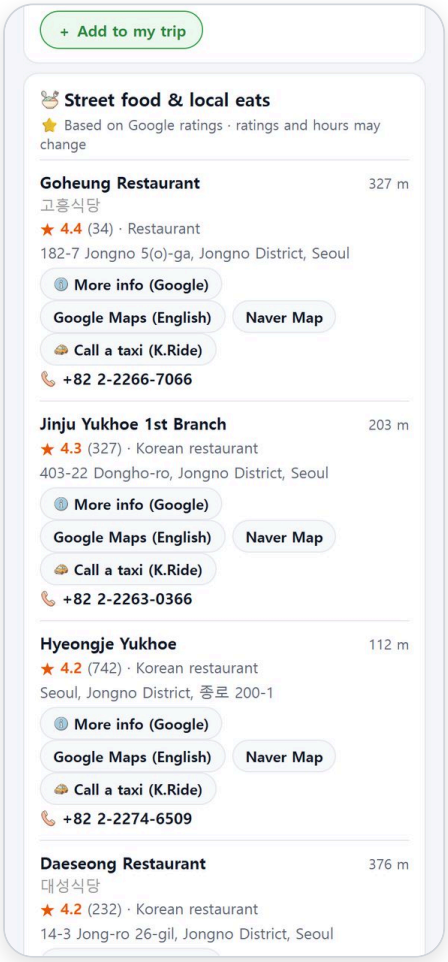

A district map shows its sights as pictures in their real places. Tap a picture to open its card. Tap the district name × at the top to go back to the region map.

7

Place cards

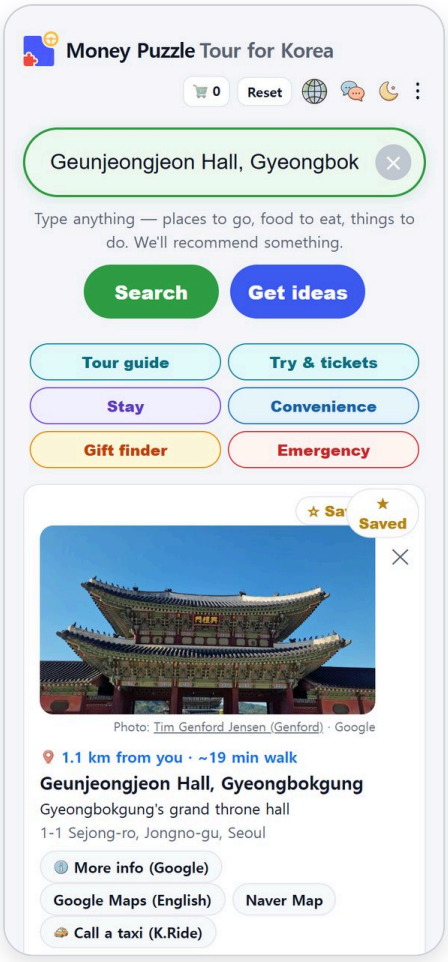

A card shows a photo, the distance from you, a short description and the address, with buttons for more info (Google), Google Maps / Naver Map directions and calling a taxi (K.Ride).

8

Shops inside streets & markets

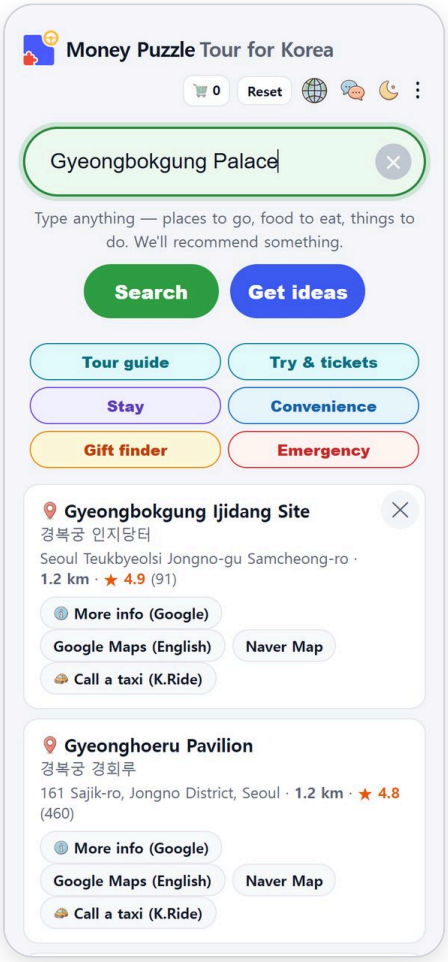

Tap a wide sight such as a market or street (e.g. Gwangjang Market, Myeongdong) and the shops inside it appear under the card, sorted by Google rating and distance, each with directions, taxi and call buttons.

9

☆ Saved places

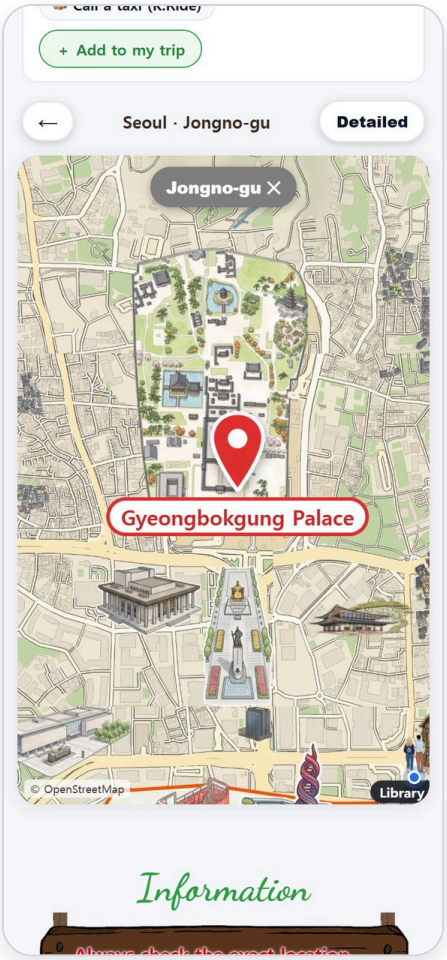

Tap "☆ Save" at the top right of a card to save it. You can also long-press the map to save any spot. Saved places gather below the map and stay only on your phone.

10

Search

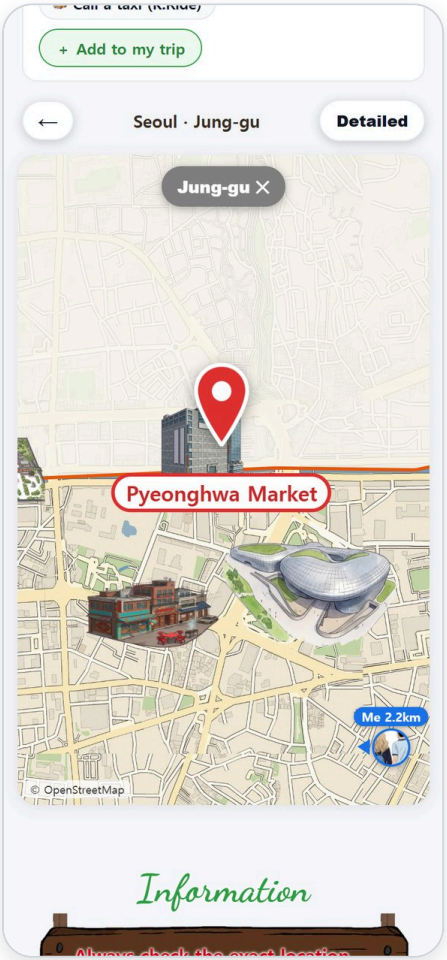

Type any place or food in the search box and tap "Search". Small spelling mistakes are fine. Tap a result to drop a pin on the map.

11

A red pin where you picked

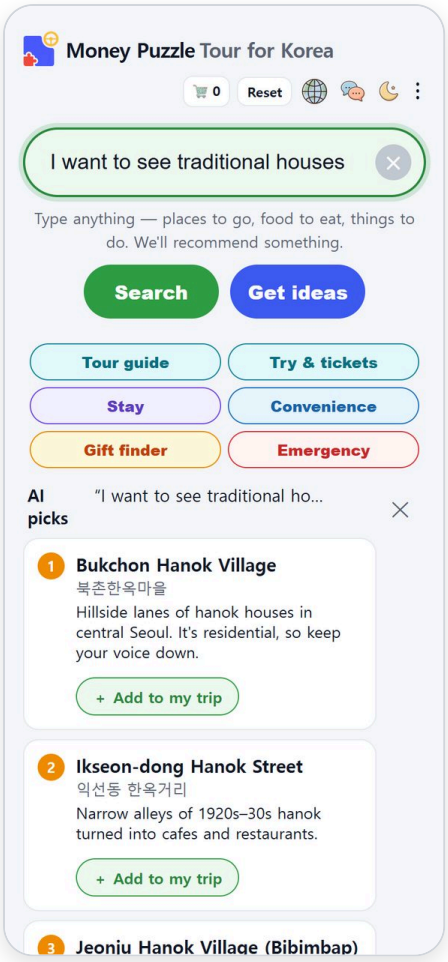

Pick a place in the results and the app opens the district map that contains it, with a red pin and name tag on the exact spot. Even for sights with a picture, the pin sits on top so you can tell which one it is.

12

Places without a picture

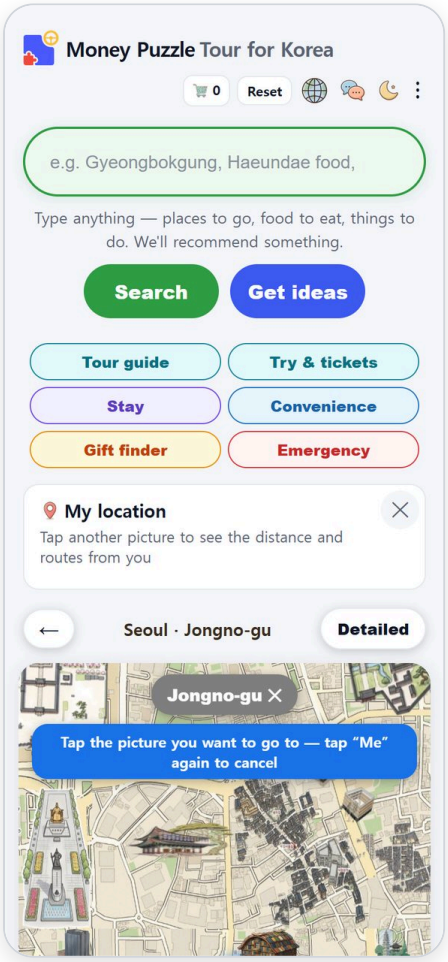

Even places with no picture on the map (e.g. Pyeonghwa Market) are shown with a red pin on the exact spot of the district map in Seoul. Outside Seoul, the pin goes on that region’s map.

13

Get ideas with AI

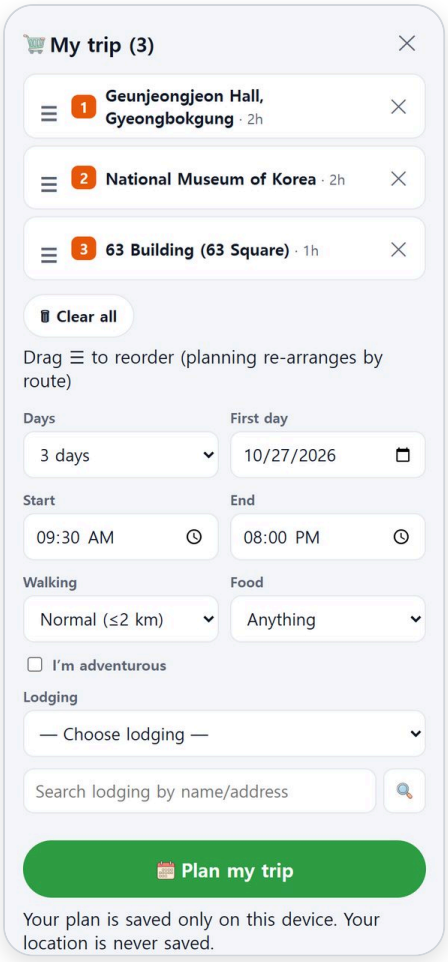

Write what you'd like to do (e.g. "I want to see traditional houses") and tap "Get ideas". AI picks sights with reasons. Add them straight to your trip with " + Add to my trip".

14

My location ("Me")

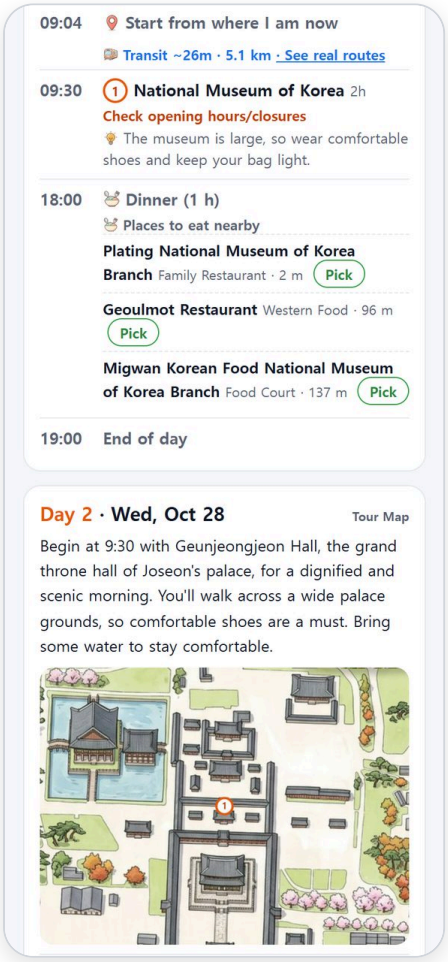

Tap "Me" at the bottom right of the map to show where you are (allow location). Then tap the picture you want to go to for distance and routes. Your location is never saved.

15

Build my trip

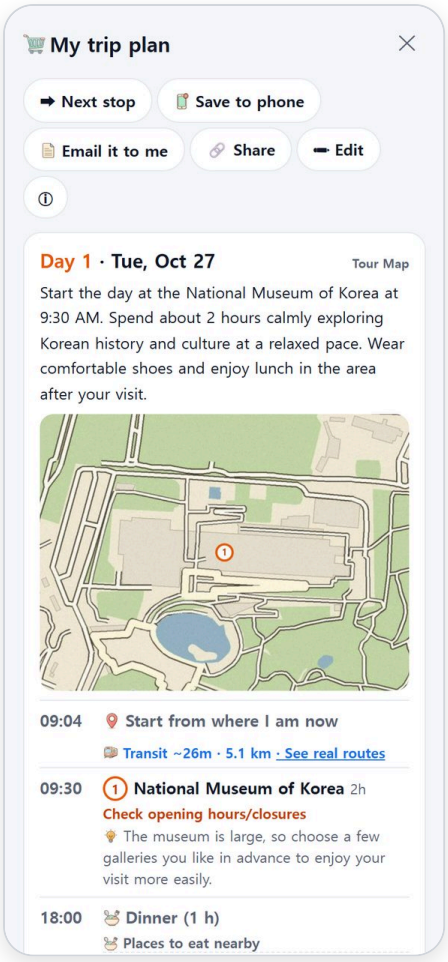

Use " + Add to my trip" on cards; the cart number in the top bar goes up. Tap the cart to see your list and drag ☰ to reorder. Choose days, hours, walking, food and lodging.

16

Plan my trip with AI

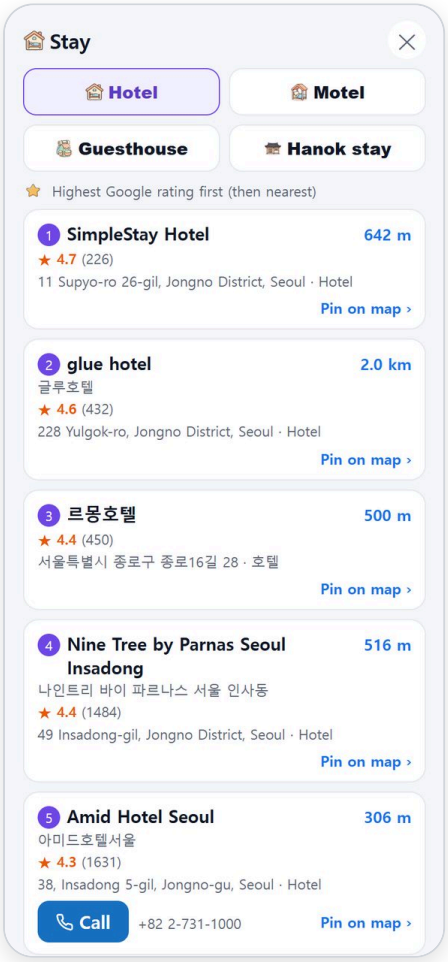

Tap "Plan my trip" for a day-by-day plan from your lodging — routes, travel times and lunch/dinner places, with tips.

17

Save as PDF, email, share

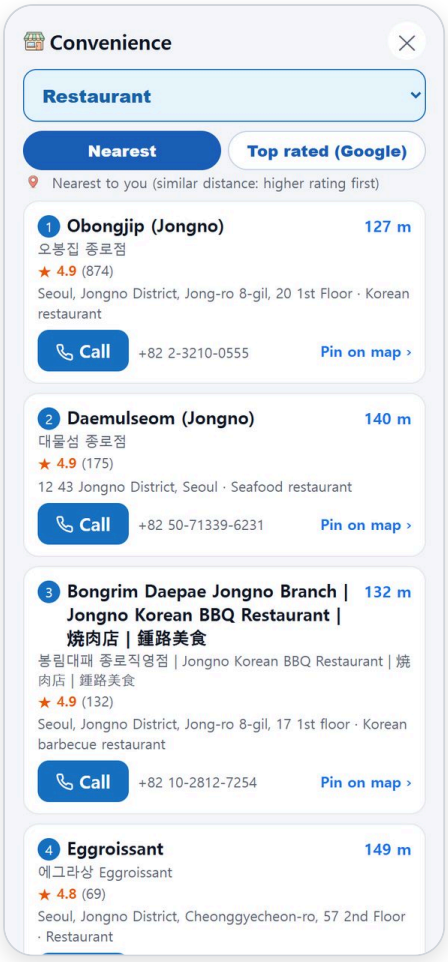

Keep your plan with “Save to phone” (PDF), “Email it to me” or “Share”. “Next stop” guides you to the next place; “Edit” lets you adjust it.

18

Stay

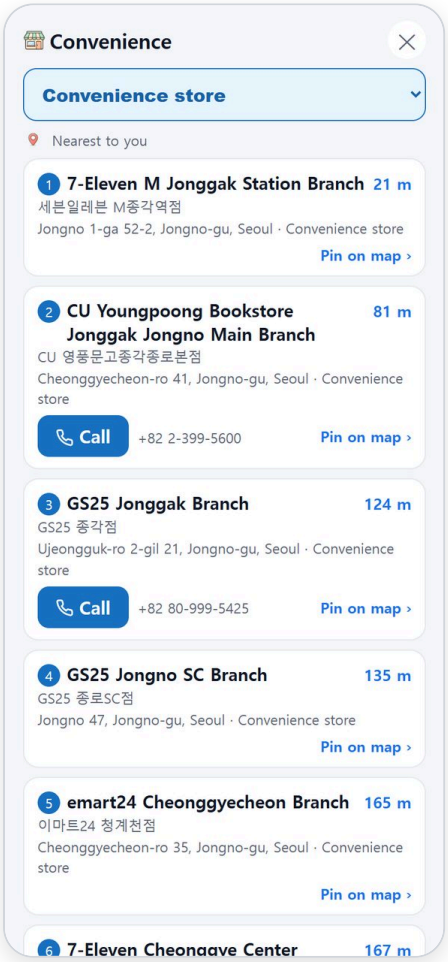

In “Stay”, choose Hotel, Motel, Guesthouse or Hanok stay to see nearby places sorted by Google rating (then distance), with Call and Pin on map buttons.

19

Restaurants

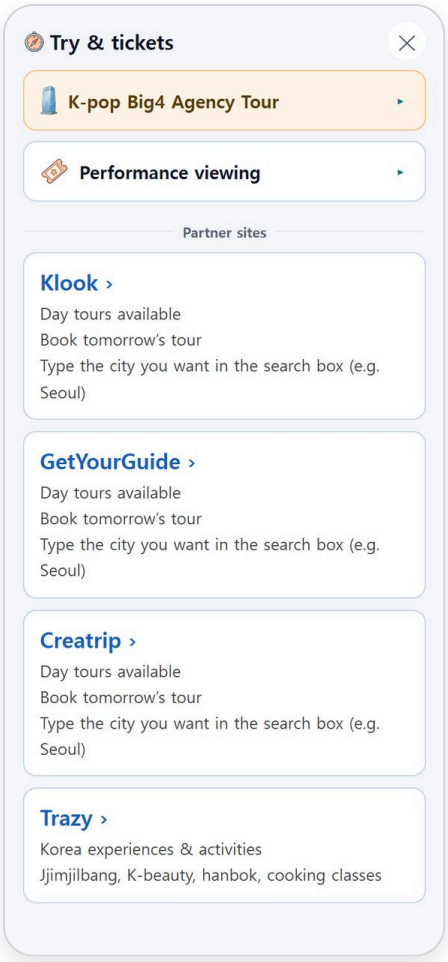

In “Convenience”, choose “Restaurant” to see places to eat within 1.5 km. Switch between “Nearest” and “Top rated (Google)”.

20

Convenience

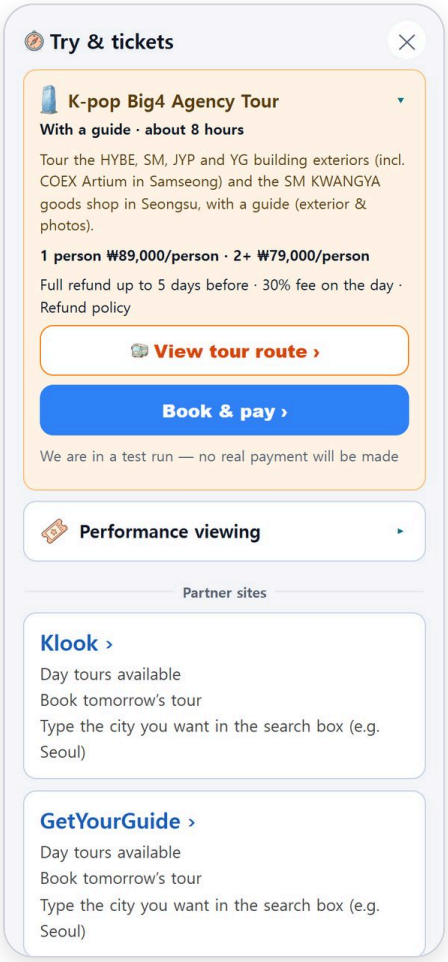

In “Convenience”, pick what you need from the box at the top — convenience store, toilet, ATM, currency exchange and more — and the nearest ones appear first. “Pin on map” shows them on the map.

21

Try & tickets

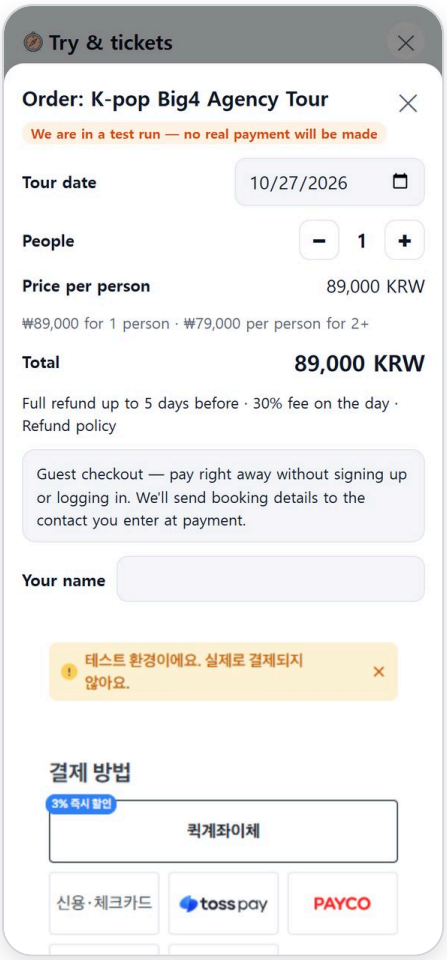

"Try & tickets" has our "K-pop Big4 Agency Tour" and "Performance viewing", plus day tours on partner sites such as Klook, GetYourGuide, Creatrip and Trazy.

22

K-pop Big4 Agency Tour

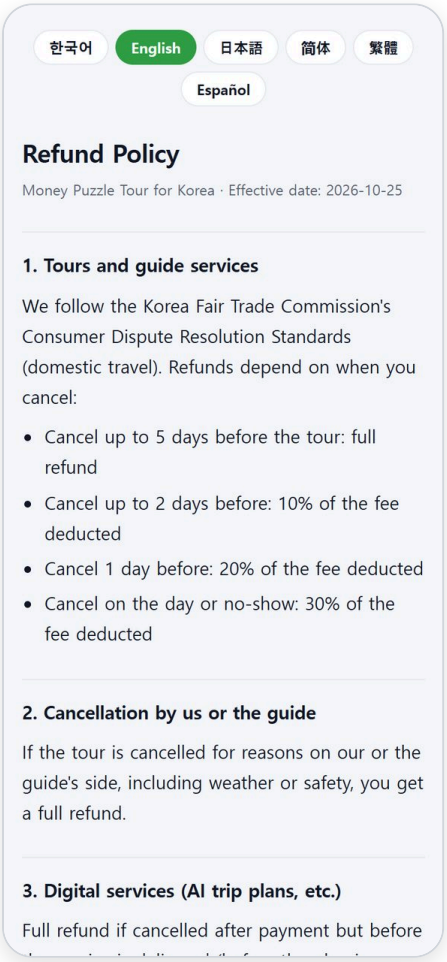

A one-day guided tour of the HYBE, SM, JYP and YG building exteriors and the SM KWANGYA store. "View tour route" shows the route on the map; prices and the refund policy are here too.

23

Booking & payment (test run)

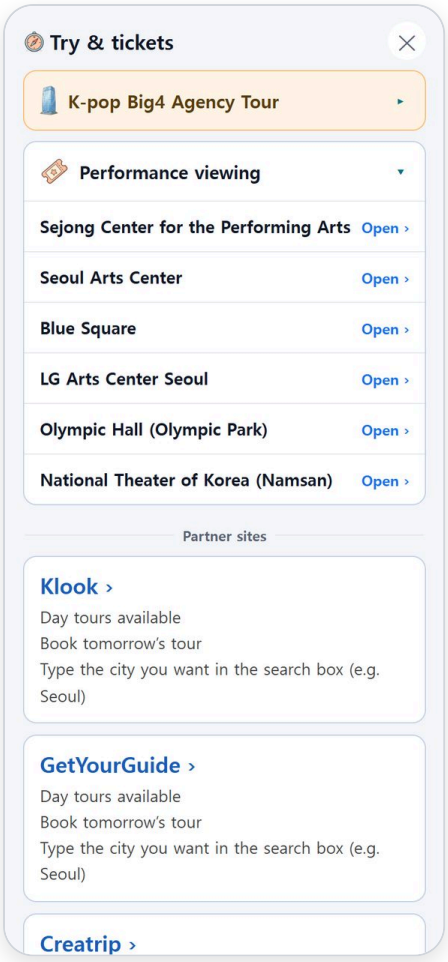

“Book & pay” opens a form to choose the date and number of people and pay right away without signing up. We are in a test run — no real payment is made.

24

Refund policy

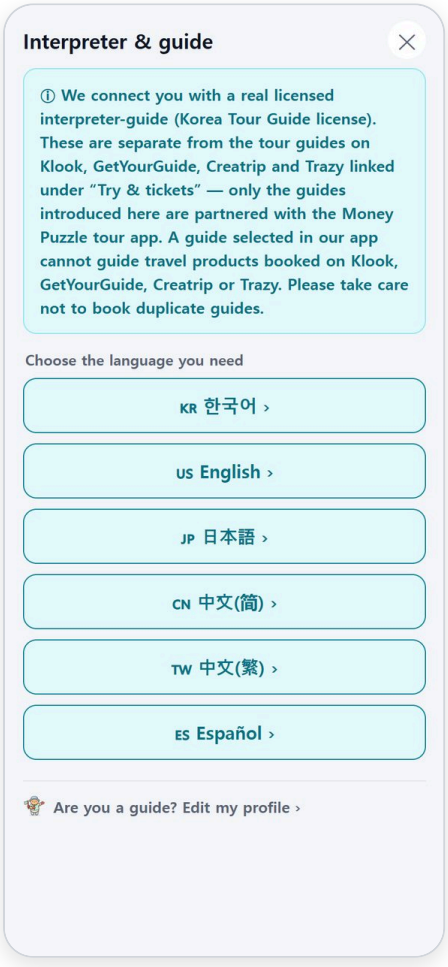

Tap “Refund policy” on the booking screen to open the policy in 6 languages. Tours are fully refunded up to 5 days before; after that a fee applies depending on the date.

25

Performance viewing

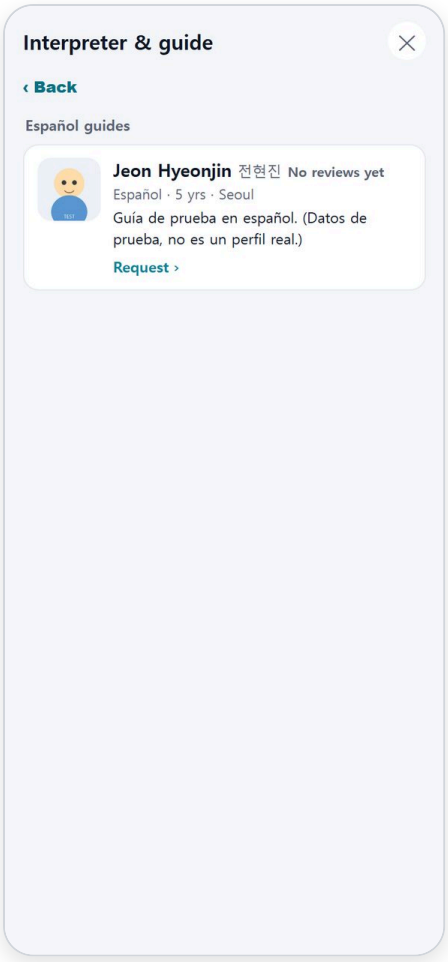

See current shows at Sejong Center, Seoul Arts Center, Blue Square, LG Arts Center, Olympic Hall and the National Theater, and tap “Open” to go to the real ticket site.

26

Interpreter & guide

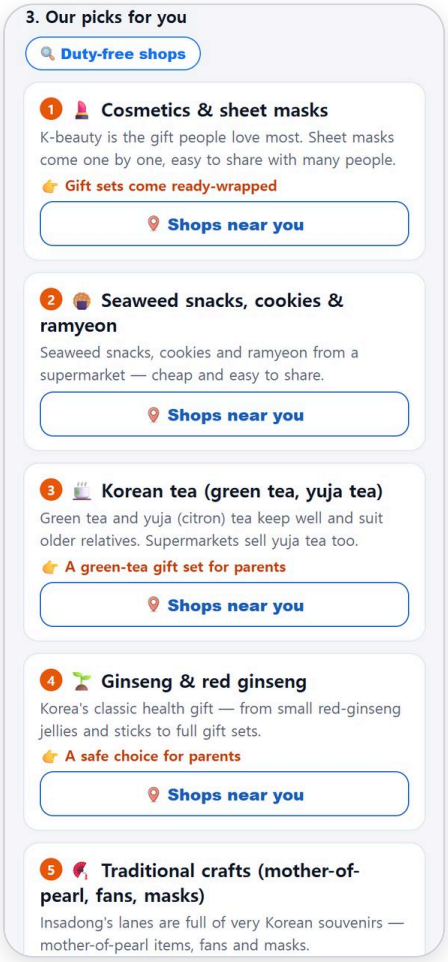

In “Tour guide”, choose the language you need to see licensed interpreter-guides (Korea Tour Guide license checked). Guides can use “Are you a guide? Edit my profile” at the bottom.

27

Guide list

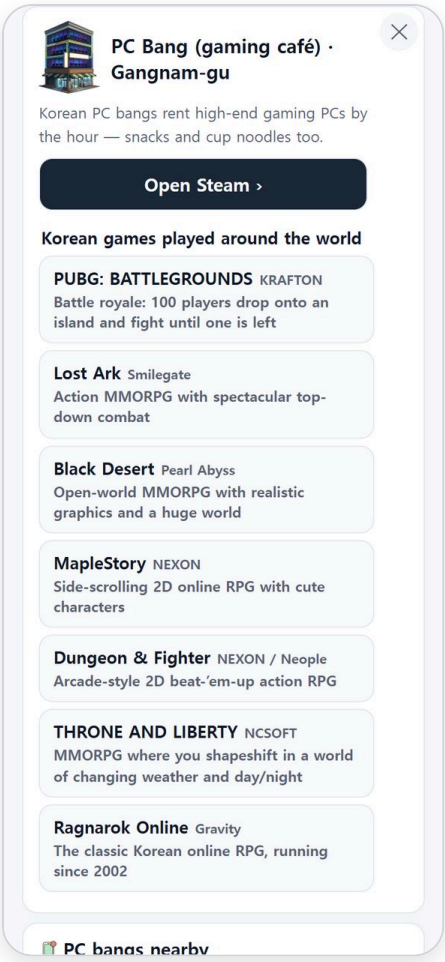

Choose a language to see guides who speak it. Names are shown in your screen language (romanized for English), with languages, years of experience and area. Pick a guide to request.

28

Gift finder

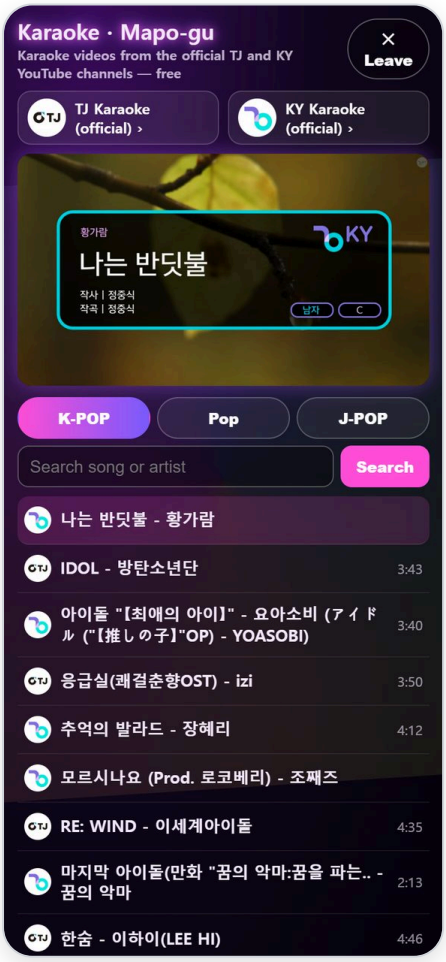

In “Gift finder”, tap who it’s for, your budget and the kind of gift; it suggests Korean gifts and finds “Shops near you” where you can buy them.

29

PC Bang (gaming café)

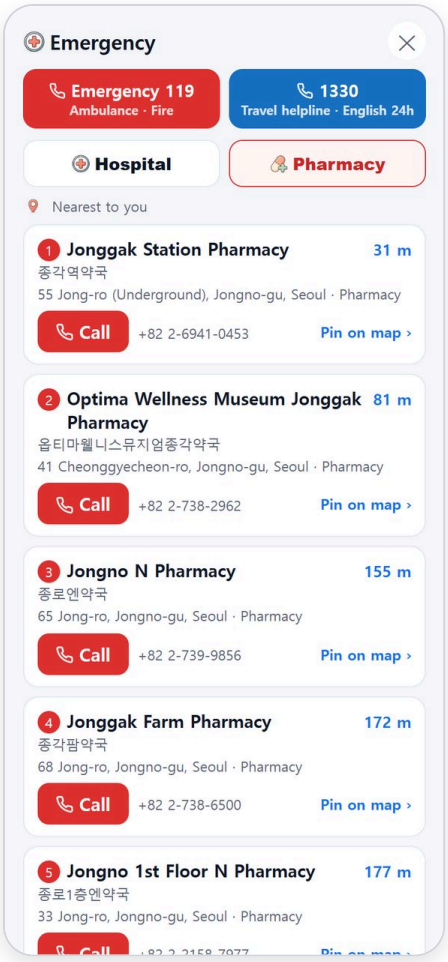

Each of Seoul's 25 districts has a PC bang picture near its busiest station. Tap it for Steam and the official sites of popular Korean games (PUBG, Lost Ark, Black Desert, MapleStory and more), followed by real PC bangs in that district sorted by Google rating and distance.

30

Free karaoke

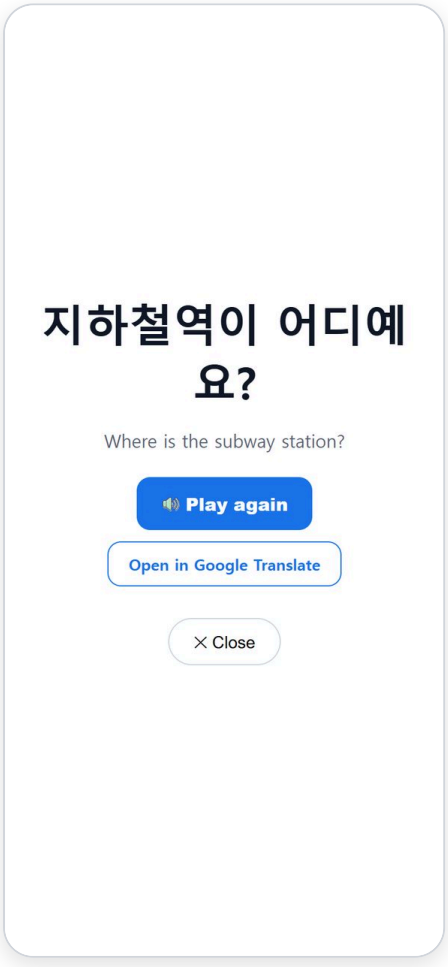

Tap the karaoke picture in any district to open a dark karaoke-room screen. Pick karaoke videos from the official TJ and KY YouTube channels by the K-POP, Pop or J-POP tabs or by search, and sing for free. The channel buttons at the top open the official channels.

31

Emergency

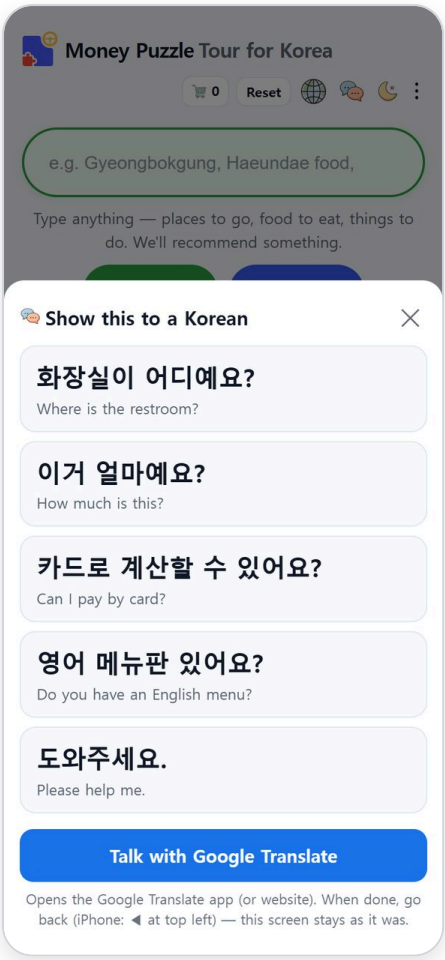

"Emergency" has call buttons for 119 (ambulance, fire) and 1330 (travel helpline, 24h in English), plus the nearest hospitals and pharmacies. Tap "Call" to phone directly.

32

Speech bubbles — translate a sentence

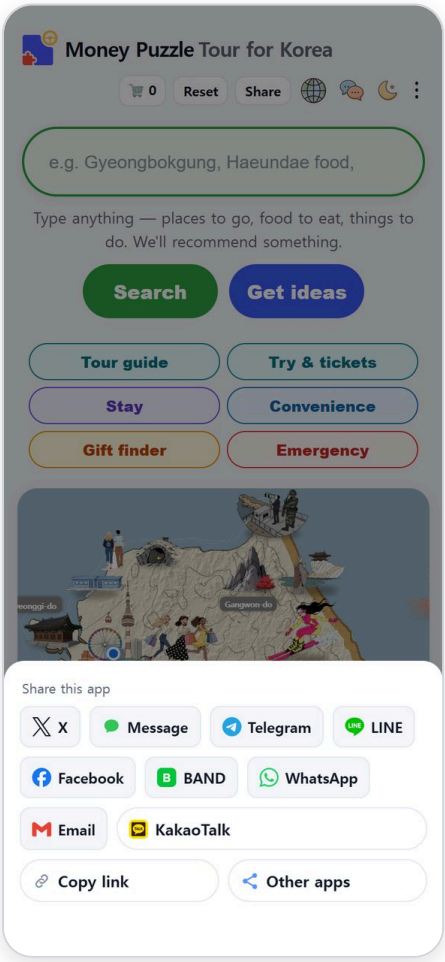

Type what you want to say in the search box and tap the speech bubbles in the top bar. It shows the sentence in large Korean (English if your screen is Korean) and reads it aloud. Show the screen to a local.

33

Phrase board

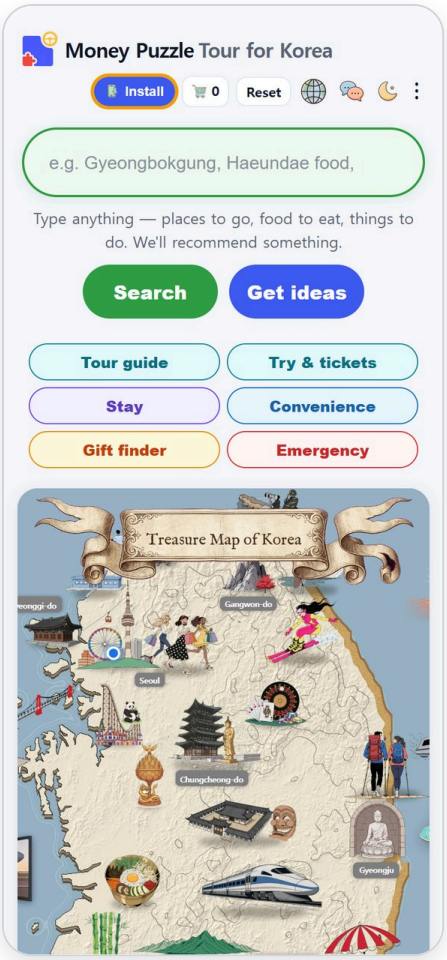

With the search box empty, the speech bubbles open a board of handy Korean phrases such as “Where is the restroom?”. Tap one to show it large, or use “Talk with Google Translate”.

34

Share

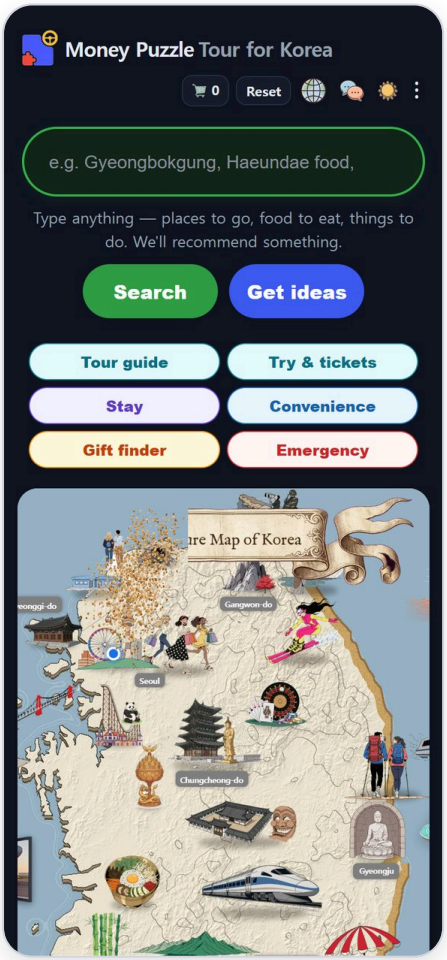

Tap “Share” in the top bar to send the app to friends by KakaoTalk, message, LINE, WhatsApp and more. They can tap “Open” to start right away or “Install app”.

35

Install the app

On Android, tap “Install” in the top bar once and the app appears on your home screen. On iPhone, use Safari’s “Share → Add to Home Screen”. Installing doesn’t work inside KakaoTalk — open the link in Chrome or Safari.

36

Night mode

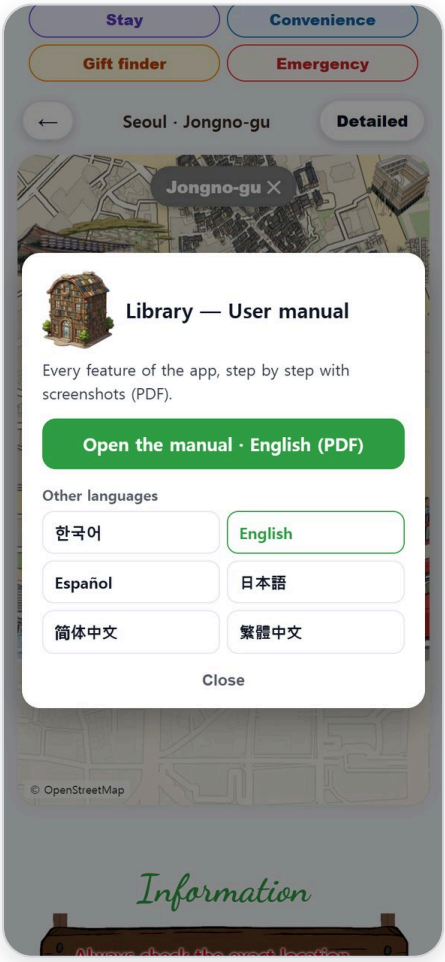

Tap the moon in the top bar for a dark screen, and the sun to switch back.

37

Information board

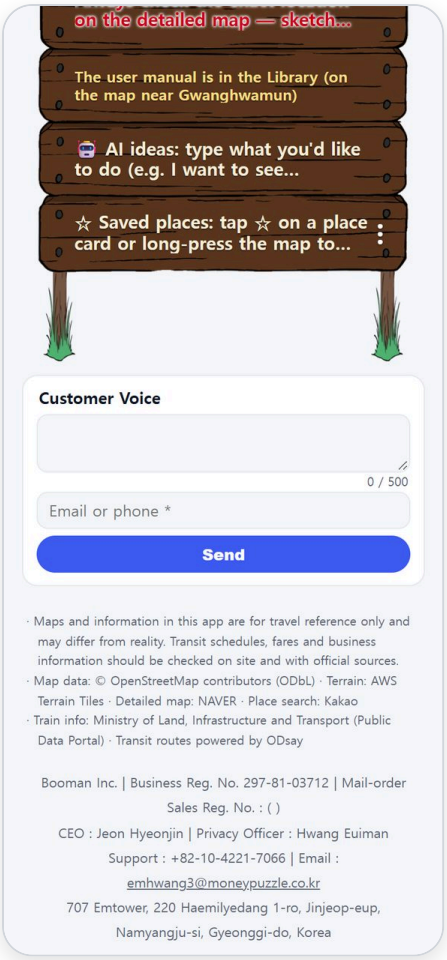

Please read the red text on the top plank of the board below the map — tap it to see it in full. The second plank points to the Library (user manual); the planks below are tips for using the app. Tap ⋮ for more.

38

The Library — user manual

Tap “The user manual is in the Library” on the board, or tap the book-built Library on the Jongno-gu / Jung-gu map of Seoul, to open this manual (PDF in 6 languages).

39

Customer Voice

Write any problem or wish, add your email or phone and tap “Send” — it comes straight to us.
